GET DATA SECURITY CONFIDENCE WITH GALAXKEY

Concerned about data privacy and security?

Galaxkey gives you a robust, cost-effective solution to protecting your data, without interfering with how you work. Use our four cutting-edge data security products together or alone to keep your data safe and compliant at all times.

Galaxkey products are ideal for government and corporate sectors that need to ensure optimum data protection and compliance.

SECURE EMAIL

Encrypt sensitive emails and attachments with just one click. Securely send and receive emails wherever you are, on any device.

Galaxkey gives you:

- Full integration with Microsoft Outlook and Outlook 365 – Galaxkey works invisibly in the background. All products also work with other email clients.
- Protection for attachments of all sizes, so you can still send large files safely.
- Secure email management on the move with our iOS and Android apps.

With Galaxkey, you can control data access and use by:

- Setting a limited lifespan for sensitive emails, after which they are digitally shredded.
- Blocking forwarding of emails without permission.
- Geofencing emails to a geographical region, to keep your sensitive data in your domain.
- Revoking an email at any time, even it's already been opened.

ABOUT GALAXKEY

SECURE FILES

Protect your files 24/7, across Windows and Mac operating systems and all devices.

With Galaxkey, you can:

- Instantly encrypt a file, making it virtually impenetrable to outside attacks.
- Store anything in your Personal Vault, which has automatic encryption. For extra protection, you can place your Vault in your chosen cloud storage.

- Protect local networks with a Corporate Vault, if required. You can configure and control who has access to your Corporate Vault.

SECURE WORKSPACE

Share data of any size with colleagues. Collaborate securely on files at the same time.

With Galaxkey, you can:

- Create Word, Excel and PowerPoint files without leaving the Secure Workspace, with our built-in document creator.

- Define access rights for your colleagues when sharing data. You control who can access each file, and what they can and can't do with it.
- Ensure all files are kept safe and secure with our built-in encryption and automatic virus scanning.

SECURE DIGITAL DOCUMENT SIGN

Send unlimited documents for fast, secure electronic signing. Galaxkey's Digital Document Sign meets all necessary legal requirements for a valid digital signature.

With Galaxkey, you can:

- Get documents signed quickly and easily with electronic signatures. Secure and convenient, it saves you time and money.
- Send documents for secure e-signature from any browser – no need to install separate software.

- Create as many files as you want for electronic signing – there's no limit on how many you can send.

For ultimate data security in store and in transit, along with added cost benefits, Galaxkey provides one comprehensive platform with all four products, under one enterprise license. Galaxkey products are also available separately.

Complete end-to-end data security

Galaxkey provides complete end-to-end security for all your documents and emails, both in transit and at rest. So your staff can get on with their daily tasks, safe in the knowledge all data is kept 100% secure, all of the time.

Your data privacy and protection are always guaranteed, because we encrypt data before it's saved in the cloud. So your data is secure even without an internet connection.

Exceptional data security – for ultimate peace of mind

Military-grade data protection through encryption standards	Galaxkey complies with AES FIPS 140-2 encryption protocols. It utilises both public AES256 and private 2048-bit RSA Keys as a standard. In plain English – this gives your data military-grade protection.
Protection against phishing attacks with biometric authentication	Galaxkey enables you to require biometric authentication from anyone before accessing your data. We're partnering with Yoti to give you an unbeatable combination of cutting-edge encryption and industry-leading biometric authentication.
Certified for public sector-standard protection	Galaxkey's encryption engine has been awarded the highest certification currently available in the UK from the National Cyber Security Agency, part of GCHQ. Commercial Product Assurance (CPA) certifies a product as suitable for public sector use.

DATA PROTECTION THAT STANDS OUT FROM THE REST

D7

Flexible set-up and use – so it doesn't interfere with staff productivity

Quick deployment and minimal training	Galaxkey offers easy, out-of-the-box set-up, whichever operating system you work on. With a Windows feel, our platform is intuitive to use. Because users need only minimal training, your staff will be able to start securing data almost immediately.
One-click security, integrated with all major operating systems	Galaxkey integrates smoothly with all major email clients and all major operating systems. It gives you one-click security to share information securely straight from Microsoft Outlook, iOS, Android Windows, and Mac, and others.
Flexible solutions to suit your existing work set-up	With Galaxkey available in on-premises, cloud and hybrid solutions, there's an option for all work environments. So you can continue to work as you choose.
Seamless integration with Microsoft AD and Okta	Galaxkey integrates with Active Directory and Okta, with the convenience of a single sign-on. So your data security protection is integrated with your organisational infrastructure, for a smooth working experience.

SUPERIOR DATA PROTECTION, FLEXIBILITY AND CONTROL

Enhanced control and compliance – for data protection confidence

Complete control with in-house key management	For ultimate control of your encryption keys and data storage, you can install Galaxkey directly on your premises. Cloud and hybrid solutions are also available.
Securely store encryption keys with HSM integration	Galaxkey integrates with leading global Hardware Security Modules for secure storage of your encryption keys.
Ensure you meet your data protection obligations	Galaxkey offers multiple configurable options for managing and storing your data. These help you ensure your organisation is complying at all times with regulatory requirements such as General Data Protection Regulation (GDPR).
